

## **NEW REGULATIONS FROM AREA WASTE**

Due to the COVID-19 outbreak the following rules and regulations have been issued by the CDC on waste pickup.

All waste needs to be bagged and tied. **No loose trash!**

Minimize interaction with the public 6 feet distance.

Other things we are doing which they are recommending.

Disinfect trucks after each run

Protective personal items

And a list of other recommendations

The **biggest suggestion is to bag all trash**, loose trash placed in the trucks will create a bigger dust cloud. Which becomes a dangerous problem for the public and the employees.

We did place notices on garbage cans last week asking for this temporary solution.

Thank you  
Scott Matley
